Miracle Detail website: what we still need from Paul and Ed

Prepared 6 October 2026 · prebuild of every page on the v0.5 staging site

The new site now has every page that exists on the v0.5 staging site: Home, the ten service pages, Packages, About Paul, Aftercare, plus Services, Gallery and Journal. Paul's text is used word for word. The only edits are em dashes (—), which became commas, colons or full stops, and a few obvious slips, listed in section 3 so you can check them.

To finish the site, we need the items below. Each one shows the page and the exact place on it.

---

1. Prices still shown as "From £???"

We left these exactly as v0.5 has them. Please send a price, or tell us to show "Price on request" or to hide the line.

Page	Where	Item
Paint correction	Five levels	Level I Enhancement Polish
Paint correction	Five levels	Level II Light Correction
Paint correction	Five levels	Level III Full Correction
Paint correction	Five levels	Level IV Advanced Correction
Paint correction	Five levels	Level V Concours Perfect
Window tinting	Film options	Standard Dyed Tint
Window tinting	Film options	Chameleon Tint
Window tinting	Film options	Windscreen Tint
Window tinting	UK legal requirements	The price under the VLT list (what is it for?)
Bodyshop & paint repair	What's available	Panel Repair
Bodyshop & paint repair	What's available	Single Panel Respray
Bodyshop & paint repair	What's available	Full Respray
Ceramic coatings	Ceramic by Paul Dalton	The coating applied at Miracle Detail
Mobile detailing	The van in the field	The price under "Same standard. Different postcode." (international work?)

Also, on the ceramic range only Heal Lite has a price ("From £2,000 + VAT"). Do you want prices on Original, Ultra V2, Self-Heal Plus and Industrial?

---

2. Text we need

Page	Where	What we need
Leather restoration	Areas covered	One line each for **Door Cards**, **Dashboard & Steering Wheel** and **Centre Console & Armrests**. On v0.5 these three show the PPF film-brand lines (SunTek, Profilm, STEK), so we show only their names for now.
About Paul	Figures under the hero	v0.5 shows "10,000+" labelled "Years in the trade". We think it should read something like "Cars detailed", but we have hidden it until you confirm the label.
About Paul	New to detailing?	The text for **"Paint looks dull or hazy"**. On v0.5 it repeats the section's intro paragraph.
Paint correction	The four-step process	A heading. On v0.5 the process repeats the levels' heading ("Before a pad is lifted / Five levels. One standard.").
Aftercare guide	The eight steps	A heading, for the same reason as above.
Aftercare guide	Every "Buy from…" button and step tag	The product links. On v0.5 every button points back to the aftercare page itself. For now they go to each shop's home page (feynlab.co.uk, garagetherapy.co.uk, cleanandshiny.co.uk). Buckets, Grit Guards, Wheel Brush and Barrel Brush are tagged in the steps but have no product card: where should they link?
Ceramic coatings	Ceramic by Paul Dalton	The link for "View on Feynlab website →", and what the word "MIRACLE" under it is (the discount code?).
Window tinting	The chameleon effect	The line "On a windscreen it is particularly effective" has no full stop. Is a sentence missing?
Window tinting	Film options	The heading says "Two films", but three options are listed. Keep it as is?
Packages	Wheel ceramic coating	Its own estimated time and price. On v0.5 this box repeats Level 5's label and "Estimated time 50–100 hours" twice, so we left those out. The ceramic page says from £200 + VAT (1 year) and £300 + VAT (3–5 years).
Journal	Whole page	Articles: title, date, category, a short summary, the article text and one photo each. The page currently shows placeholder text and stays hidden from Google until it has real articles.
Gallery	Hero	We wrote the line "From the archive." because v0.5's Gallery page is empty. Happy to use your wording instead.
All pages	Footer	A **privacy policy** and **terms** page. The booking form collects names, phone numbers and photos, so a privacy notice is needed before launch.

3. Slips on v0.5 we fixed, please confirm

1. **Ceramic and Window tinting swapped a paragraph.** The ceramic page showed the UK VLT paragraph under "Ceramic by Paul Dalton", and the tint page showed the Ceramic by Paul Dalton paragraph under "UK legal requirements". Each paragraph is now on its own page.
2. **Dry ice:** the paragraph "First, kinetic energy…" appeared twice (also under "Experience that matters"). It now appears once.

3. **Paint correction:** the levels were numbered I, 2, 3, 4, 5. They now read I to V.
4. **Paint correction:** the caption "Rolls-Royce Silver Shadow" also sat on a photo of Paul polishing a Pagani. It is now used only on the Rolls-Royce photo. The car in that photo looks like a Mercedes-Benz 600 Pullman (the same car as on the Bodyshop page), not a Silver Shadow. The caption is still as written: should it change, or is there a photo of the Silver Shadow? (08/10: Fender dropped this photo and its caption from the page.)
5. **Small punctuation tidy-ups** caused by v0.5 line breaks: "What's . included." → "What's included." · "Why choose mobile Nothing compromised." → "Nothing compromised." · "Wheel ceramic. coating." → "Wheel ceramic coating." · "From / From £1,000+VAT" → "From £1,000+VAT".
6. **About Paul, Nippon Television 2008:** v0.5 shows the same photo three times, so it now appears once.
7. **About Paul, 2015 LaFerrari:** v0.5 showed the dry ice photo here. We used v0.5's own LaFerrari photo instead.
8. **Packages vs Ceramic:** Packages says "Feynlab Ultra **V3**" and "Self-Heal **Lite**", while the ceramic page says "Ultra **V2**" and "Heal Lite". Which is right?
9. **About Paul, 2025:** this entry says "The coating launches in 2024". Should it sit under 2024?
10. **Homepage "Underside Coating" card:** v0.5 has no underbody page, so the card now opens the Industrial Coating card on the ceramic page. Is that right?
11. **Contact:** v0.5 has no contact page, so "Contact" in the menu and the old /contact-us/ link go to the booking form. Do you want a separate contact page?

4. Photos

Page	What we used	What would be better
Paint protection film, Gloss/Matte/Colour	AI edits of a GF Williams photo (demonstration only)	Paul's own gloss, matte and colour PPF jobs
Window tinting	No tint photo of Paul's exists in the Drive, the old gallery or v0.5. The hero and overview are the old site's two tint photos (they look like stock); film options and "Who it's for" are free stock photos. Since 13/10 the chameleon and UK law blocks draw on Paul's own cars from the Drive (Ferrari 599, black RS6 Avant), not described as tinted; bulletproof keeps a stock photo	Photos from Paul's next tint job: the film being squeegeed onto the inside of the glass, trimming the edge, the VLT meter on the glass, the car before and after from the same spot (front three-quarter and side). A chameleon windscreen if he has fitted one. Nothing for bulletproof film, since it must stay confidential
Paintless dent removal	Paul's two PDR photos from the Drive (black Audi = hero, E30 M3 = overview). Steps 2 and 4 are cut from the Audi photo (since 13/10); steps 1 and 3 and the three kinds of dent are AI renders (close-ups, no logos)	On his next PDR job, shot close under the light board: (1) the dent with the board's lines bending round it, (3) the rod or tool working the dent, the lines almost straight, (5) the panel finished; plus a ding, hail damage and a larger dent before repair
Bodyshop	Old-site photo of a Ferrari Roma, and the Mercedes 600 restoration	Repair jobs, before/after
Wheel refurbishment	Old-site photos (1,200 px wide, a little soft on large screens)	Larger originals or newer jobs

Page	What we used	What would be better
Leather restoration	Since 13/10: Paul's Drive set ("leather before and after"): the Porsche 911 job (seats finished, dash masked) and four new before/after pairs; three of the old site's pairs stay. The hero is still the old site's photo	A hero photo of Paul himself on a leather job (the man spraying the 911's seats is not Paul). Which car is the beige interior (7083–7086) and the cream seat with red piping (5153–5156)?
Wheel refurbishment, the work	One before & after only (the VW in Paul's Drive collage, small and soft once cropped; its tyre lettering looks retouched). The other three jobs are finished wheels from the old site, shown whole and up close	Before and after photos of a few wheel jobs, the same wheel shot from the same angle, and the car each belonged to
Mobile detailing	Paul's own photo of the Caddy in Portugal. v0.5 uses an AI picture of the van.	A current photo of the van at a client's home
Mobile detailing, Portugal	The F12 TDF and 599 GTO from Portugal; the third car is a 997 GT3 RS from the old gallery, captioned "from the gallery"	A photo of the Porsche GT3 RS detailed in Portugal (2020)
About Paul, 2026 new studio	One photo	More photos of the new Lingfield studio
Gallery	133 jobs from the old site, mostly 2016. Only 9 have a description.	Newer jobs, and a line or two about each car if you have it. Should the "50/50s" collection stay?
Every service page	Hero photos taken from v0.5, the old site and the Drive set	4K originals, if Paul has them
Paint correction, process	Decontamination: an old gallery photo of a C63 with its wheels off. Work: six cars from the Drive set, named only	A decontamination photo (iron fallout remover, clay). Which of the six cars had paint correction? Paint depth gauge: now a photo Fender supplied (`assets-src/drive/paint-depth-gauge.avif`, only 400 px wide, source/licence to confirm); a larger photo of Paul's own gauge would be better.

Credits to confirm: GF Williams (LaFerrari, 458 Speciale, water beading), Andreas Jansson (Paul with the Monza SP), and the homepage SF90 Spider photo, which carries another detailer's "ESOTERIC" watermark and needs their permission or a replacement.

5. Business details to confirm

- **Address:** v0.5 and Google say "Unit 10, Jesmor Trading Estate". The old site says "Unit 8–9 Jesmor Farm". The new site uses Unit 10.
- **Email:** info@miracledetail.co.uk, taken from the v0.5 aftercare page.
- **Google rating:** 5.0 from 139 reviews, as of 1 October 2026.
- **VAT:** prices show "+ VAT". We can switch every price to VAT-inclusive in one step if you prefer.

Built from the v0.5 staging site (miracledetailuk.detailersmovement.com) as it stood on 6 October 2026. If Paul changes anything there, tell us and we will pull it across.
